

Notifications

The screenshot shows the OPTIQO interface with the 'Notifications' tab selected. The left sidebar contains a menu with options: Customers, Users, Users/Groups, Notifications (selected), Key figures, Cleaning frequencies, Control groups, Contracts, Inspections, Work orders, and Reports. The main content area displays a table of notifications with columns: Name, Description, Trigger on, Trigger source, Target, Language, Email subject, and a 'Con' column. The table lists several notifications, including '1 hour before', 'Cleaning from inspection', 'Cleaning Issues Notification', 'Completed inspection', 'Fire extinguishers Notification', 'Security Inspection Notification', and 'Snow Clearing E-mail Notification'. Each row has checkboxes for 'Email' and 'Work order' in the 'Target' column.

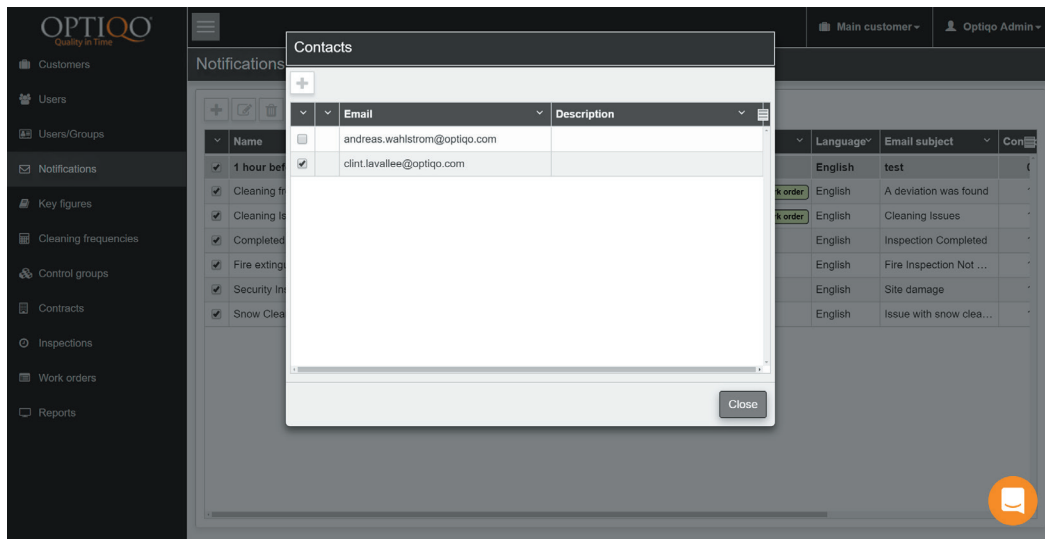

Name	Description	Trigger on	Trigger source	Target	Language	Email subject	Con
1 hour before		Control	Reminder (not started)	Email	English	test	
Cleaning from inspection	-	Control	Feedback deviation image	Email Work order	English	A deviation was found	
Cleaning Issues Notification		Event	Feedback deviation image	Email Work order	English	Cleaning Issues	
Completed inspection	Completed inspection	Control	Reminder (completed)	Email	English	Inspection Completed	
Fire extinguishers Notification		Control	Reminder (not started)	Email	English	Fire Inspection Not ...	
Security Inspection Notification		Control	Feedback damage image	Email	English	Site damage	
Snow Clearing E-mail Notification		Control	Feedback deviation image	Email	English	Issue with snow clea...	

In this tab you can set up notifications to be sent out. For example if an inspection has not been done, an email notification will be sent out to specified person. Or, you can send out notifications everytime an error has been reported.

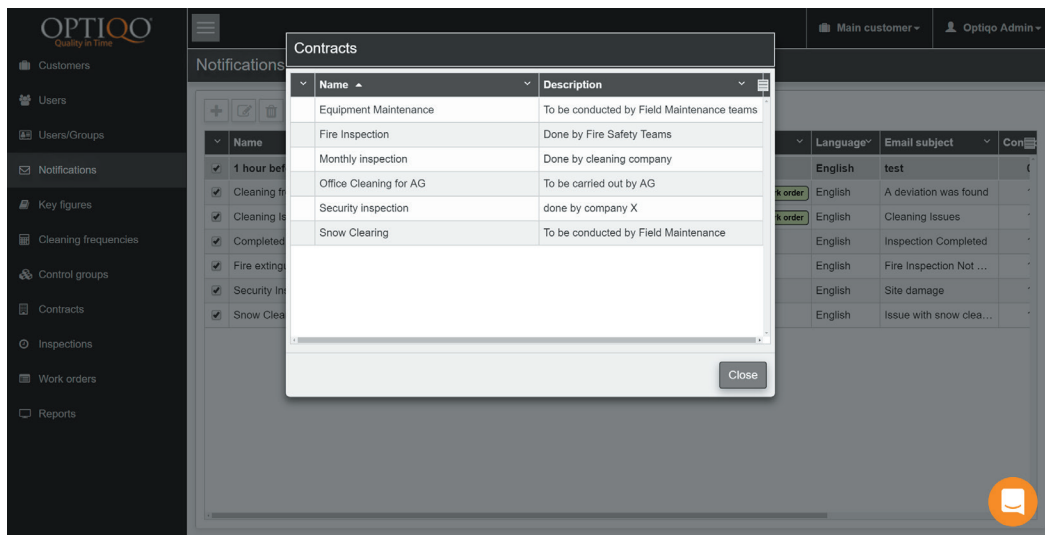

The screenshot shows the same OPTIQO interface, but with the 'Add notification' dialog box open. The dialog has a 'General' tab and fields for Name, Description, Trigger on (dropdown), Trigger source (dropdown), Target (radio buttons for 'Send email' and 'Create work order'), Language (dropdown), and Email subject. The 'Close' and 'Save' buttons are at the bottom right of the dialog.

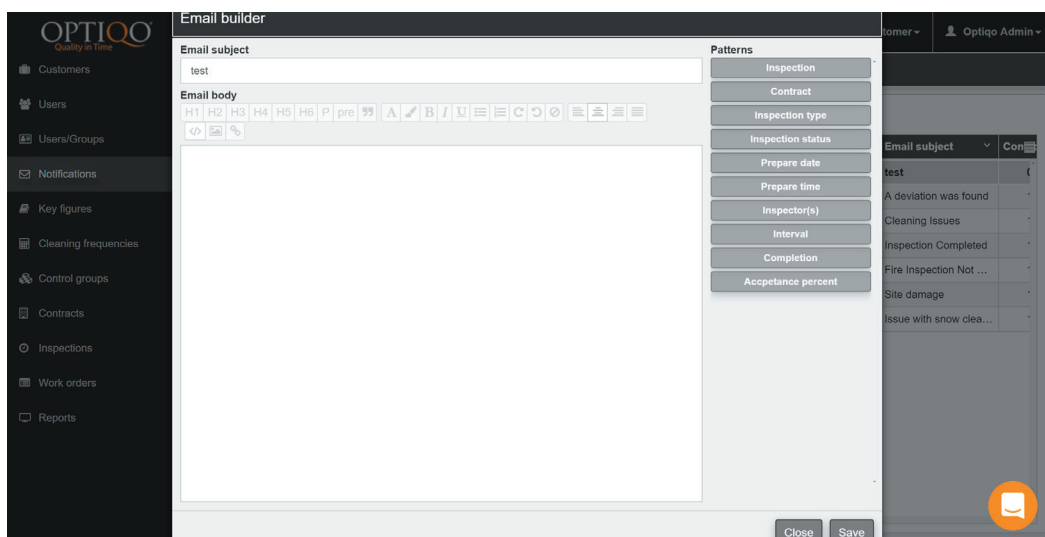

This is what it will look like when you add new notifications.

This is the email list of contacts that get the notifications.

This is the contracts that are linked to the notifications. Doubleclick the empty box to add contracts.

Here you can manage the email that will get sent out.
